

Permaculture

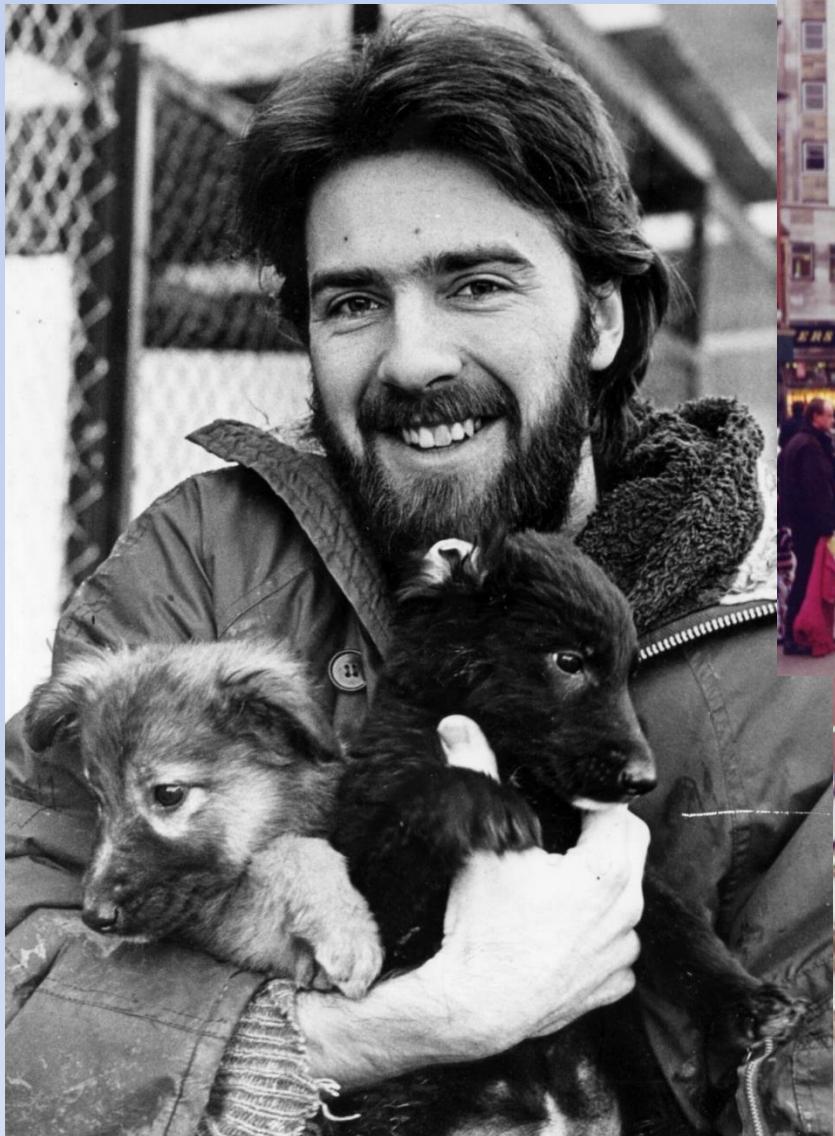

A design science for all

A photograph of a lush, green forest. The foreground is covered in thick, vibrant green moss growing on fallen logs and tree stumps. Large, mature trees with dark trunks and sprawling branches form the midground and background. Sunlight filters through the dense canopy, creating bright highlights and deep shadows. The overall atmosphere is one of a healthy, sustainable ecosystem.

The challenge
To meet our human needs
in a truly sustainable way
by learning from nature

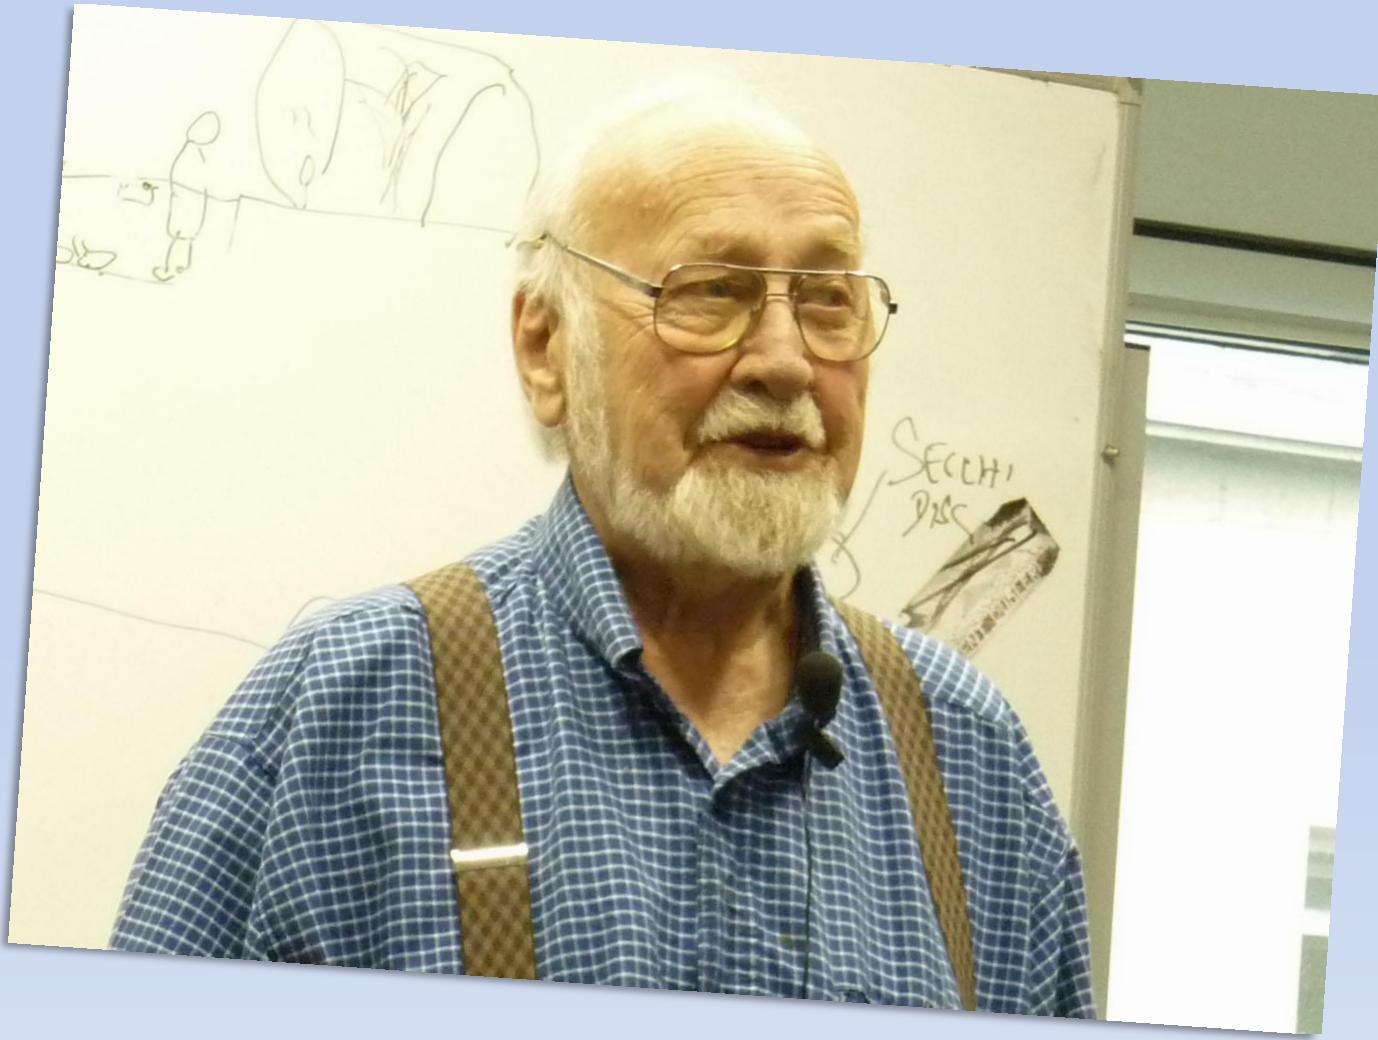

Three levels of needs

My own story, from reactive...

...to creative

Bill Mollison's gift...

Perma-goggles!

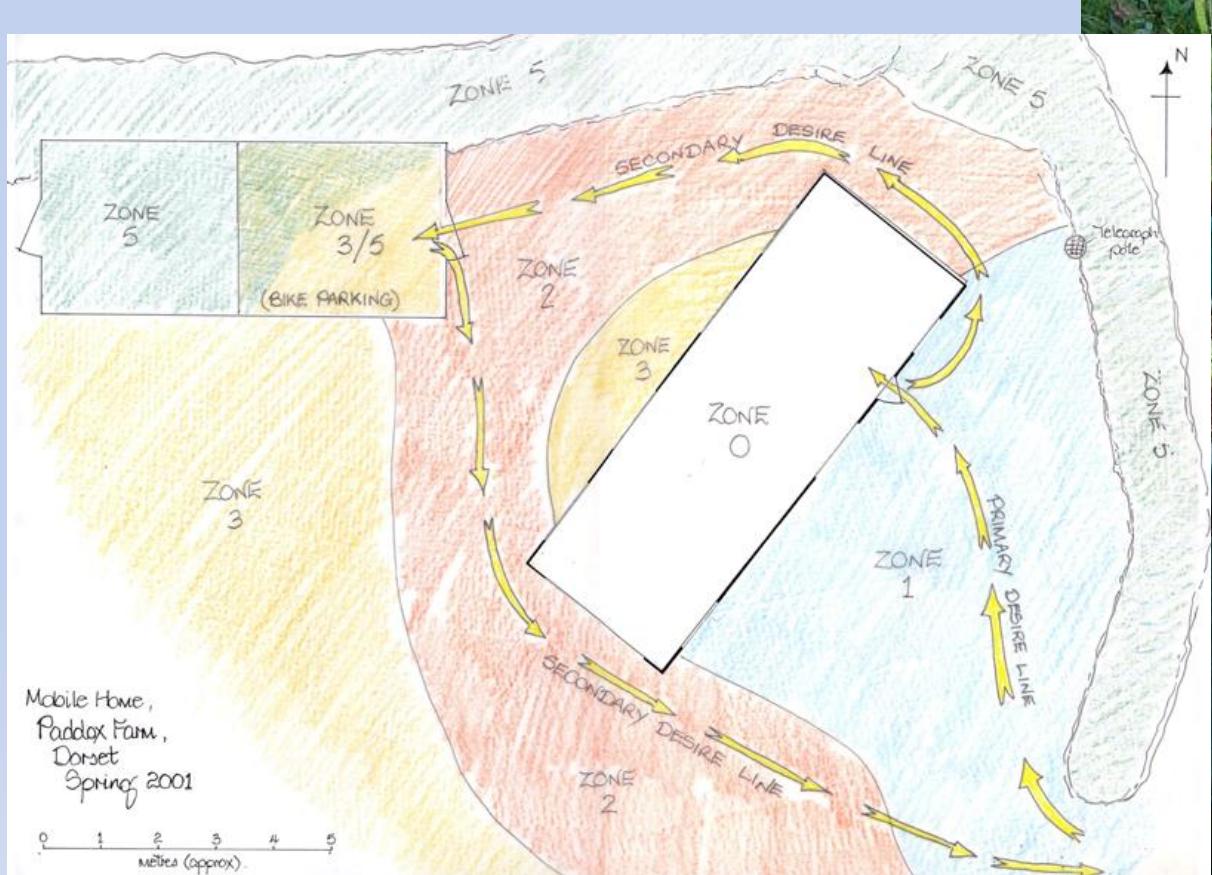

At home in Eire

Making gardens

Energy efficient planning

**Organic Gardener
(for hire)**

If you need help in your garden, but you want it to stay free of chemicals.....

I understand!

I've been gardening this way for over 15 yrs & have been using Permaculture principles (sustainable design practices) for the last 8 yrs .

Aranya Gardens ..for a safe, sustainable & personal service.

Natural Garden Maintenance & Design

"Make your garden a healing space, not a poisonous one."
